## EDUCATION

---

### **Juno College of Technology**

Toronto, Canada

*Web Development Immersive Bootcamp*

*April 2022 - July 2022*

- Collaborated with front-end developers to create and maintain large-scale user interfaces while also providing feedback during code reviews to improve code efficiency.
- Carefully troubleshooted several edge cases for React components and successfully debugged issues found across many web clients.

### **Toronto Metropolitan University**

Toronto, Canada

*Bachelor of Fine Arts, Film Studies*

*Sep 2012 - April 2017*

- Produced creative assets using Creative Cloud tools such as Adobe Photoshop and Illustrator for Marketing campaigns.

## EXPERIENCE

---

### **Administrative / Executive Assistant**

Mar. 2018 – Aug. 2019

*National Association of Broadcast Employees and Technicians*

*Toronto, ON*

- Contributed to the development of email marketing campaigns utilizing platforms such as Mailchimp to deliver high-quality emails to clients
- Oversaw the complete execution process, including compiling spreadsheets using Microsoft Excel to manage a large volume of confidential user information.
- Created and maintained a digital database for legacy production files, leading to work efficiency across all departments.

### **Senior Gelato Chef**

May. 2020 – April. 2022

*Lola's Gelato*

*Toronto, ON*

- Managed the development of effective social media campaigns by incorporating industry-standard search engine optimization techniques, leading to an increase in website traffic.
- Improved store operations through the direct management of inventory and the successful training and integration of new employees.

## PROJECTS

---

### **Sun Run** | *HTML5, CSS3, JavaScript (ES6), React, REST API, SCSS, Git, GitHub*

- Developed a user-friendly and accessible interface, ensuring adherence to updated web accessibility standards and contributing to the search engine optimization of the application.
- Worked with a remote, cross-disciplinary team including UX designers and developers to integrate new features and user interface designs, resulting in a comprehensive website with a wealth of content.
- Used several applications such as Adobe Photoshop and Figma to create detailed wireframes to streamline the overall development process.

### **Recipe Finder** | *HTML5, CSS3, JavaScript (ES6), REST API, SCSS, Git, GitHub*

- Analyzed REST API data using API Testing platforms such as Postman resulting in the success of fetching data asynchronously.
- Successfully resolved various browser compatibility issues during code review sessions with fellow developers by thoroughly troubleshooting edge cases and implementing effective error handling.

### **Beat the Machine** | *HTML5, CSS3, JavaScript (ES6), React, Firebase*

- Developed a high-performing user-facing web application using JavaScript and React, allowing for efficient updates to the user interface through integration with RESTful APIs and storing user information in the Firebase Realtime Database.
- Implemented industry-standard techniques for semantic HTML, responsive CSS, and React / JavaScript to ensure a consistent user experience across all browsers and devices

## SKILLS

---

**Languages & Libraries:** JavaScript (ES6), HTML5, CSS, SCSS/SASS, React, jQuery, NodeJS, Tailwind

**Developer Tools:** Firebase, GitHub

**Spoken & Natural Languages:** English, French, Scots
